Profile

Full-Stack Software Engineer with commercial experience building production web applications and hands-on experience designing real-time and domain-driven systems primarily with TypeScript and Node.js.

Technical Skills

Languages: TypeScript, JavaScript, SQL, Python, Java
Backend: Node.js, Fastify, Express, REST/GraphQL, WebSockets, SSE, Redis
Systems: Kafka/Redpanda, Microservices, Docker, k6
Frontend & Data: React, Next.js, PostgreSQL, Prisma, Supabase, Tailwind CSS

Commercial Experience

Software Developer | Equitas.ai | Nov 2023 – Mar 2025

- Engineered core customer-facing features using React, TypeScript, and REST/GraphQL APIs within an agile team.
- Refactored legacy UI components into reusable design-system primitives, reducing tech debt and frontend bundle size.
- Built data visualization dashboards using Chart.js and resolved critical production defects across UI and API layers.

Technical Support Specialist | Surge Fitness | Sep 2022 – Nov 2023

- Triaged platform defects and translated user-reported edge cases into technical specs for the external dev team.
- Collaborated with developers to scope requirements and identified UX bottlenecks, lowering support ticket volume.

Software Engineering Intern | News UK | 2021

- Contributed to frontend feature delivery, QA testing and CMS integration within The Sun Web engineering team.

Featured Engineering Projects

Signal – Real-Time Stream Processing & Fraud Detection Engine | TypeScript, Fastify, Redpanda, Redis, ONNX, Next.js

- Built an event-driven engine processing transaction streams with sub-20ms p99 latency at 1,250 RPS load via k6.
- Implemented $O(\log N+M)$ sliding windows in Redis and in-process ONNX Isolation Forest inference in Node.js.

Workshop – Automotive Operations & Workflow SaaS | TypeScript, Next.js, Express, Supabase (PostgreSQL), Tailwind CSS

- Architected a domain-driven vehicle lifecycle management platform enforcing a strict Repository/Service pattern.
- Implemented relational schemas, transactional audit logging, and state machines to prevent invalid workflow transitions.

Replay AI – Verifiable AI Clinical Decision & Audit Platform | TypeScript, Next.js, Express, Python, Supabase, Gensyn REE

- Built an audit-first clinical tool executing local REE runtimes via Python bindings to log cryptographic verification.
- Awarded **Best Use of Cursor** (Cursor AI Hackathon 2026) for shipping full-stack clinical workflows and tamper-evident audit ledgers.

Education

- MSc in Software Development (Part-Time, Distance Learning)** | Queen's University Belfast | 2027
- PGCert in Computer Science** | University of York | 2023
